SCOPE

ALDI Distribution Center

Moreno Valley, CA

Cold storage facility for global supermarket chain

800,000 sq. ft.

Sika Sarnafil 80 mil PVC membrane roof system, with engineered Double-Weld seam application. System requirements included FM-190 wind uplift rating, UL Class A, and 30-year NDL and high-wind warranty. Rigid insulation assembly up to R-58 for eight various Cooler/Freezer zones, with vapor isolation construction between climate sections. Applied insulation board of approximately three million square feet. Scope also included installation of Sarnafil protection slip sheet at the ballast trays and pipe support (21,847 locations) and provided roof flashings at 1,171 penetrations needed to support the building's 2.5 MW PV system. The accelerated eight-week schedule was safely met with a full-time Site Manager and an average crew of 24 roof technicians.
